

EA History Recorder™

PC - based desktop application

The EA History Recorder™ Process:

Install Election Assistant™ software onto Palm® Pilots while the EA History Recorder™ Desktop application is running on your PC

Use the EA History Recorder™ to import voter history information into your voter registration system.

Poll judges use Palm® Pilots to verify voter eligibility and record voter history simply by touching the voters name on the screen

At the end of the Election Day transfer the voter history data from the Palm® Pilots to the EA History Recorder™

History Recorder™

The EA History Recorder™ is a Windows® based desktop application that allows your poll judges to collect voter history at the polling place using Palm® Pilots and the Election Assistant™ Palm® application. After the election, the voter history is transferred from the Palm® Pilots to the EA History Recorder™, which displays all of the voter history data in an easily searchable format, highlights any duplicate voters, and then quickly and accurately imports the data into ANY voter registration system.

The EA History Recorder™:

- Enables history recording functionality for the Election Assistant™
- Flags duplicate voters
- Records the date, time, and polling location of each vote
- Imports voter history into any voter registration system

For a personal online demonstration of the EA History Recorder™ call 1-800-670-4090
